SUMMARY

Results-driven and motivated Software Engineer with a demonstrated experience in improving software performance, testing and updating existing software, and developing new software functionalities. Got experience participating in the complete product development life-cycle of successfully launched applications. Love to contribute to open-source projects and help the community.

SKILLS

Programming Languages

Go, C#, SQL

Databases

PostgreSQL

MongoDB

Redis

Dgraph

Technical

Object Oriented Programming

Functional Programming

SOLID Design Principles

Test Driven Development

Software Architecturing

REST, GraphQL, WebSocket

OAuth2, OIDC

Tools

Linux, Git

Nginx, Traefik

Jaeger, Prometheus

NATS, RabbitMQ, gRPC

Docker, Docker Swarm, Kubernetes

CI/CD, Drone

Terraform

AWS

Languages

Persian - Native

English - Intermediate

CAREERS

Platform Engineer

Berops - Remote | June 2021

- Writing controllers and operators for the Kubernetes platform.
- Developing and maintaining open-source projects.
- Exposing HTTP API for the front-end and evolving gRPC API
- Pair-Programming with junior developers to help and learn them writing clean and testable codes.

Expert Freelance Cooperator

Toggl Hire - Remote | June 2021

- Creating Golang and Tech questions for hiring platform to help companies find best candidates.

Software Engineer

Pragmidea - Remote | February 2021 to May 2021

- Implemented B2B and B2C applications.
- Worked on .Net and Golang based services using PostgreSQL, Mongo and GraphQL API.
- Maintained cloud infrastructure and set up CI/CD pipeline using Drone integrated with self hosted Git server by Gitea.
- Collaborated with the team in order to solve spikes and business challenges.

Software Engineer

Profile Digital | July 2018 to November 2020
